

Math Class

This school has many interesting classes, for example, math classes.

We are going to tell you about our math class.

We love math classes.

There are two reasons.

Choice of Courses

First, there are two courses. They are the basic course, and the advanced one.

We can choose one of them. We can often teach each other. Also, we can ask questions easily because our teachers are friendly and kind.

So, we can study math easily even though it's difficult.

Basic Course

Advanced Course

Chance to Review

Second, there are many chances to review. There's a quiz every class at the beginning. And we use our tablets on it.

So, it's easy to understand. And, we can solve many and various problems.
